

5つのまちづくり
3
5 pillars of town development

安全・安心で 住みよいまちづくり

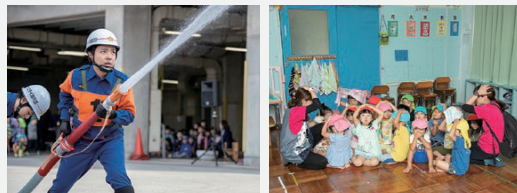

Creating a safe, secure and comfortable city to live in

上空から見ると兼久海浜公園

地球にやさしく、快適で安全に暮らせる住環境の整備

誰もが快適に生活でき、町民がいつまでも暮らしたいと思える住環境の整備を推進します。そのための取り組みとして、土地利用と住環境の充実、道路交通ネットワークの形成、上下水道の整備、公害防止等を進め、密集市街地の解消や公園をはじめとした生活基盤の整備、バリアフリー化の充実を図ります。また、地球環境にやさしく、あらゆる災害に強く安全・安心でありながら自然と都市が調和したまちづくりを目指します。その実現に向けて自然環境の保全を緑地の充実や防災・交通安全の推進、基地対策等を推進するとともに、地域の防災力向上に取り組みます。さらに、ごみ減量化やリサイクルの推進等を通して、環境への負担を少なくし、環境衛生対策の強化や循環型社会の形成の実現を目指します。

Creating an environment that is kind to the earth, comfortable and safe to live in.
We will promote the development of a living environment where everyone can live comfortably for years to come. To that end, we will promote land use and living environment enhancement, road traffic network formation, water and sewage development, pollution prevention, etc., eliminate densely populated urban areas, improve living infrastructure such as parks, and enhance barrier-free access. In addition, we aim to create a city that is friendly to the global environment, resistant to all kinds of disasters and in harmony with nature and the city.
We will work to improve the disaster prevention capabilities of the region while promoting the conservation of the natural environment, the enhancement of green spaces, the promotion of crime prevention, traffic safety and military base measures. Furthermore, we aim to reduce the burden on the environment, strengthen environmental hygiene measures, and create a recycling-oriented society by reducing the amount of waste and promoting reuse.

嘉手納町の主な取り組み

自然環境の保全と緑地の充実

嘉手納町に残された緑地の保全に努めながら、自然生態系の維持、河川や海岸環境の保全・整備を行います。その施策として、町民や来訪者にとって、自然とのふれあいの場となっている比謝川や、風光明媚な海岸の水辺空間の整備に取り組みます。その際、水辺の生態系の保全や景観、親水性に十分配慮します。また、台風の影響により落石や倒木が度々発生した比謝川遊歩道沿いにおいては、自然環境に配慮しながら急傾斜対策、落石対策を推進します。町内にある公園などの憩いの場、遊びの場については、その確保や維持、充実を図り、自然とともに生きるまちづくりを目指します。その実現のために、町民・事業者・行政それぞれが連携し、住宅地、企業用地、公共用地の都市緑化を図ります。また、屋良城跡公園や嘉手納公園、兼久海浜公園においては、歴史・文化、レクリエーション、防災等、それぞれの公園の機能や保全、利活用法に応じ、再整備やリニューアル事業を推進します。さらに、美しい住環境と街並みの創出に向けて、町民・企業・行政が連携して花木の植栽や清掃等、美化活動に取り組み、自然との共生意識の向上、その行動を促進する環境学習を推進します。

Conservation of the natural environment and enhancement of greenery
While striving to conserve the green spaces left in Kadena town, we will maintain the natural ecosystem and conserve the river and coastal environment. We will work on the improvement of the Hija river, which is a place for townspeople and visitors to interact with nature and the waterside space on the scenic coast. At that time, we will give due consideration to the conservation of the waterside ecosystem, landscape, and hydrophilicity. In addition, along the Hija River promenade, where rockfalls and fallen trees frequently occur due to the effects of typhoons, we plan to install steep slope countermeasures and rockfall countermeasures. We aim to create a town that lives in harmony with nature by securing, maintaining, and enhancing the rest areas such as parks in the town. In order to achieve this, the townspeople, businesses, and government will work together to increase nature through the residential, corporate and public land.
In addition, at Yara Castle Ruins Park, Kadena Park, and Kaneku Seaside Park, we will promote redevelopment and renewal projects according to the functions, conservation, and utilization methods of each park, including aspects of history, culture, recreation, and disaster prevention. Furthermore, in order to create a beautiful living environment and cityscape, the townspeople, companies and the government will work together on beautification activities.
